Fixed Bars

**Hybrid Metal Lingual Bar** has highly polished gingival and lingual surfaces designed for reduced vertical height and high strength, combined with horizontal slots for improved acrylic retention.

**Traditional Hybrid Bar** has a highly polished gingival surface with buccal and lingual finish lines. It is a sanitary design with minimal metal exposure combined with horizontal slots for improved acrylic retention.

**Y-Bar** follows a standard hybrid wrap-around design with a modified Y-shape configuration which can be scaled to provide a larger load-bearing surface in the posterior region. Design includes standard machined surface with a high polish on the transmucosal portion that attaches to the prosthetic interface for prevention of calculus formation, thereby facilitating hygiene maintenance.

**I-Bar** follows a standard hybrid wrap-around design with a modified I-shape configuration and blended distal implant/abutment reinforcement for high-load distal extensions. Design includes standard machined surface with a high polish on the transmucosal portion that attaches to the prosthetic interface for prevention of calculus formation, thereby facilitating hygiene maintenance.

**Post Bar** follows a standard hybrid wrap-around design with the addition of tooth/acrylic reinforcement posts per tooth site. Design includes standard machined surface with a high polish on the transmucosal portion that attaches to the prosthetic interface for prevention of calculus formation, thereby facilitating hygiene maintenance.

**Fixed Bar Pricing**

- For 2-3 Implants: $695
- For 4-6 Implants: $795
- For 7-10 Implants: $895

Receive $100 off bars fabricated on four or more Implant Direct ScrewIndirect 1-piece implants or multi-unit abutments.
Overdenture Bars

**Hader Bar** follows a precise Hader form with a highly polished surface matched to the gingival contour. Design includes Hader clips and corresponding components for denture fabrication. Up to 4 clips are included on each bar and additional clips may be added at an extra cost.

**LOCATOR® Bar** has a highly polished surface matched to the gingival contour with buccal lingual walls tapered to various degrees. Design includes LOCATOR® male and female attachments for denture fabrication. Up to 4 attachments are included on each bar and additional attachments may be added at an extra cost.

### Overdenture Bar Attachments

**LOC BAR Female 2.0 mm Thread (2 pk)**

2000-92S-L2 = $88.29

**LOCATOR® Male Processing Pkg (2pk)**

1000-98SI-L2 = $64.29

**Hader EDS Clips - WHITE**

99-531012 (6pk) = $19.00 per pack

**Hader EDS Clips YELLO**

99-531010 (6pk) = $19.00 per pack

**Hader EDS Clips RED**

99-531014 (6pk) = $19.00 per pack

**Hader EDS Clip Combo Pack**

(6 clips and 1 seating tool)

99-531009 = $50.00

**Hader EDS Housings**

99-531060 (6pk) = $65.00

---

### Overdenture Pricing

**For 2-3 Implants:**

- Hader Bar: $595
- LOCATOR® Bar: $795

**For 4-6 Implants:**

- Hader Bar: $895
- LOCATOR® Bar: $1,095

**For 7-10 Implants:**

- LOCATOR® Bar: $1,195

*Receive $100 off bars fabricated on four or more Implant Direct ScrewIndirect 1-piece implants or multi-unit abutments. The Overdenture bar price includes up to 4 male and female attachments. Additional attachments can be added at an extra cost.*
